

Capability Statement

Company Overview

Consulting for Health, Energy & Sustainability LLC (CHESS) is a Veteran Business Enterprise that provides strategic project management, project monitoring and consulting technology services to commercial, not for profit and government organizations to adhere to sustainability benchmarks and standards. Our consultants work with our client's in a holistic manner to produce deliverables on time, on budget with quality control measurements.

Our goal is to drive total sustainability through efficient, cost-effective and innovative strategies that increase profitability and capitalize on market drivers.

Core Capabilities:

- Management Consulting. Assessment. Process Improvements. Project Management.
- Project monitoring, create, document, and share a visual timeline with stakeholders for compliance and Visual Work Progress via Video, Photograph and Documentation (Cloud Based)
- Aerial Inspection, Site Survey and Structure Modeling (Crane, Infrared, Structure, Commercial Certified FAA Drone Pilot)
- We provide inspection services for new building, investigation, insurance claims, tower and antenna to capture accurate data quickly.

Key Differentiators:

- Our main FAA Certified Drone Pilot has over 10 years experience in Aerial Drone Flight Experience
- Our organization can develop custom IT platforms to manage project task to help improve project success and being on budget.
- Our staff understand LEED and other sustainable project solutions
- Customized Solutions. We work side-by-side with you to develop a customized package that aligns to your overall need.
- Our consultants are certified in building performance, healthy environments, energy efficiency and renewable energy
- We believe in working with **People's** environmental health needs, **Profitability** of an organization financial bottom line and the ability to do all of these things while protecting our **Planet** resources. **The Triple Bottom Line Philosophy.**

Past Performances:

- During 2017 hurricane season, we project managed ground campaigns to supply emergency food & water supplies, emergency power and solar equipment to 70 facilities in the US Virgin Islands.
- Project managed, orchestrated and designed a system to securely handle a network of 4,000 Faith Based Organizations with 2,000,000+ members with an Internet Portal via Microsoft Azure and Virtual Servers to disseminate Health and Suitability Information.
- Successfully managing the implementation of solar site survey, Construction project monitoring and inspections of communication towers through Northeast Ohio, Alabama and Georgia
